

The purpose of this correspondence is to stress the importance of AIR 1 radio transmission. AIR 1 is a positive alternative to radio stations that offer music that portrays and validates our youth as baseless individuals. My specific concern is that LPFM broadcasting will provide other programming that fits this latter description thereby nullifying the unique and positive effects of AIR 1. The service AIR 1 provides to the public via airwaves is in the public interest because it promotes positive programming and leads to decreased road rage on our busy freeways. I donate to AIR 1 on a monthly basis so it is important to me and is integral to my worldview.
